

OVERVIEW

At TENFOLD, we visualize a universe that exists beyond a blank page or empty canvas. We are a tribe of creators working to inspire and connect people to place and culture in a meaningful way.

As a Designer at TENFOLD, you are a highly attuned and collaborative creator with 3-7 years of experience. You'll apply your gifts to participate in creating an elegant and engaging experience for our clients alongside fellow designers and Senior designers. As a designer, you see the big picture and carefully craft the individual pieces that create the whole, bringing the creation fully to life. Engaging in our creative process with our design community, you'll help to make a vision a reality — a visual representation of that client's brand and culture.

PROFILE

COLLABORATIVE

True collaboration is magical. It is the moment when a creative force is among the team in a way that is almost palpable. As a Creator at TENFOLD, you are passionate about the value of collaboration and an active member contributing to projects that you are leading, as well as, those being led by other team designers.

COMMITTED TO CREATING

Success not only takes expertise, but also curiosity and a commitment to creating. Design is at our foundation. You toil and tweak and edit and scrap and start all over again, but when you've got it, you know.

ENTREPRENEURIAL

TENFOLD Creators participate, hands on, in the acceleration of an entrepreneurial company no matter their level or role. You have the opportunity to form and inform our processes and our culture... putting your fingerprint on the journey. We are committed to this cultural trait regardless of our size or time in business, because it keeps us sharp and keeps things fun.

POSITIVE

As Creators, we are trained to be critical. We are always looking for ways to make something better, but we must support the critique process with positivity, respectful of the ideas of the team and our clients. Optimism prevails at TENFOLD®. Because of our culture, no issue or challenge is beyond a solution. You have the power and the responsibility to influence change for the better.

ARTICULATE

Our solutions are unique because they are strategic, thoughtful and smart. As a digital designer, you are articulate. You are able to convey your ideas, views and solutions through effective communication and authentic presentation.

ROLE

- Create fresh ideas by participating in concept collaboration, carrying projects from conceptualization to production
- Bring ideas to life through our design process
- Assist in facilitation of collaborative sessions to identify goals, objectives, and overall vision for the project
- Present designs to clients periodically, especially throughout the design and implementation processes
- Manage assigned projects including milestone planning and deadlines
- Work with fabricators and technology partners to present designs for purposes of cost estimates and project management
- Create and package production files to be sent for fabrication.

QUALIFICATIONS

- 3-7 years of experience in a design discipline including Graphic Design, Visual Communications, and Industrial Design
- A 4-year degree in Graphic Design, Visual Communications, Industrial Design, or Environmental Design
- Demonstrated client project experience and robust portfolio of representative work
- Skilled in Adobe Suite programs such as Illustrator, Photoshop, and InDesign
- Ability to articulate verbally and through text narrative
- Knowledge of programs such as Sketchup, 3D Max (or another similar 3D program), or Solidworks is a plus
